

Website Design

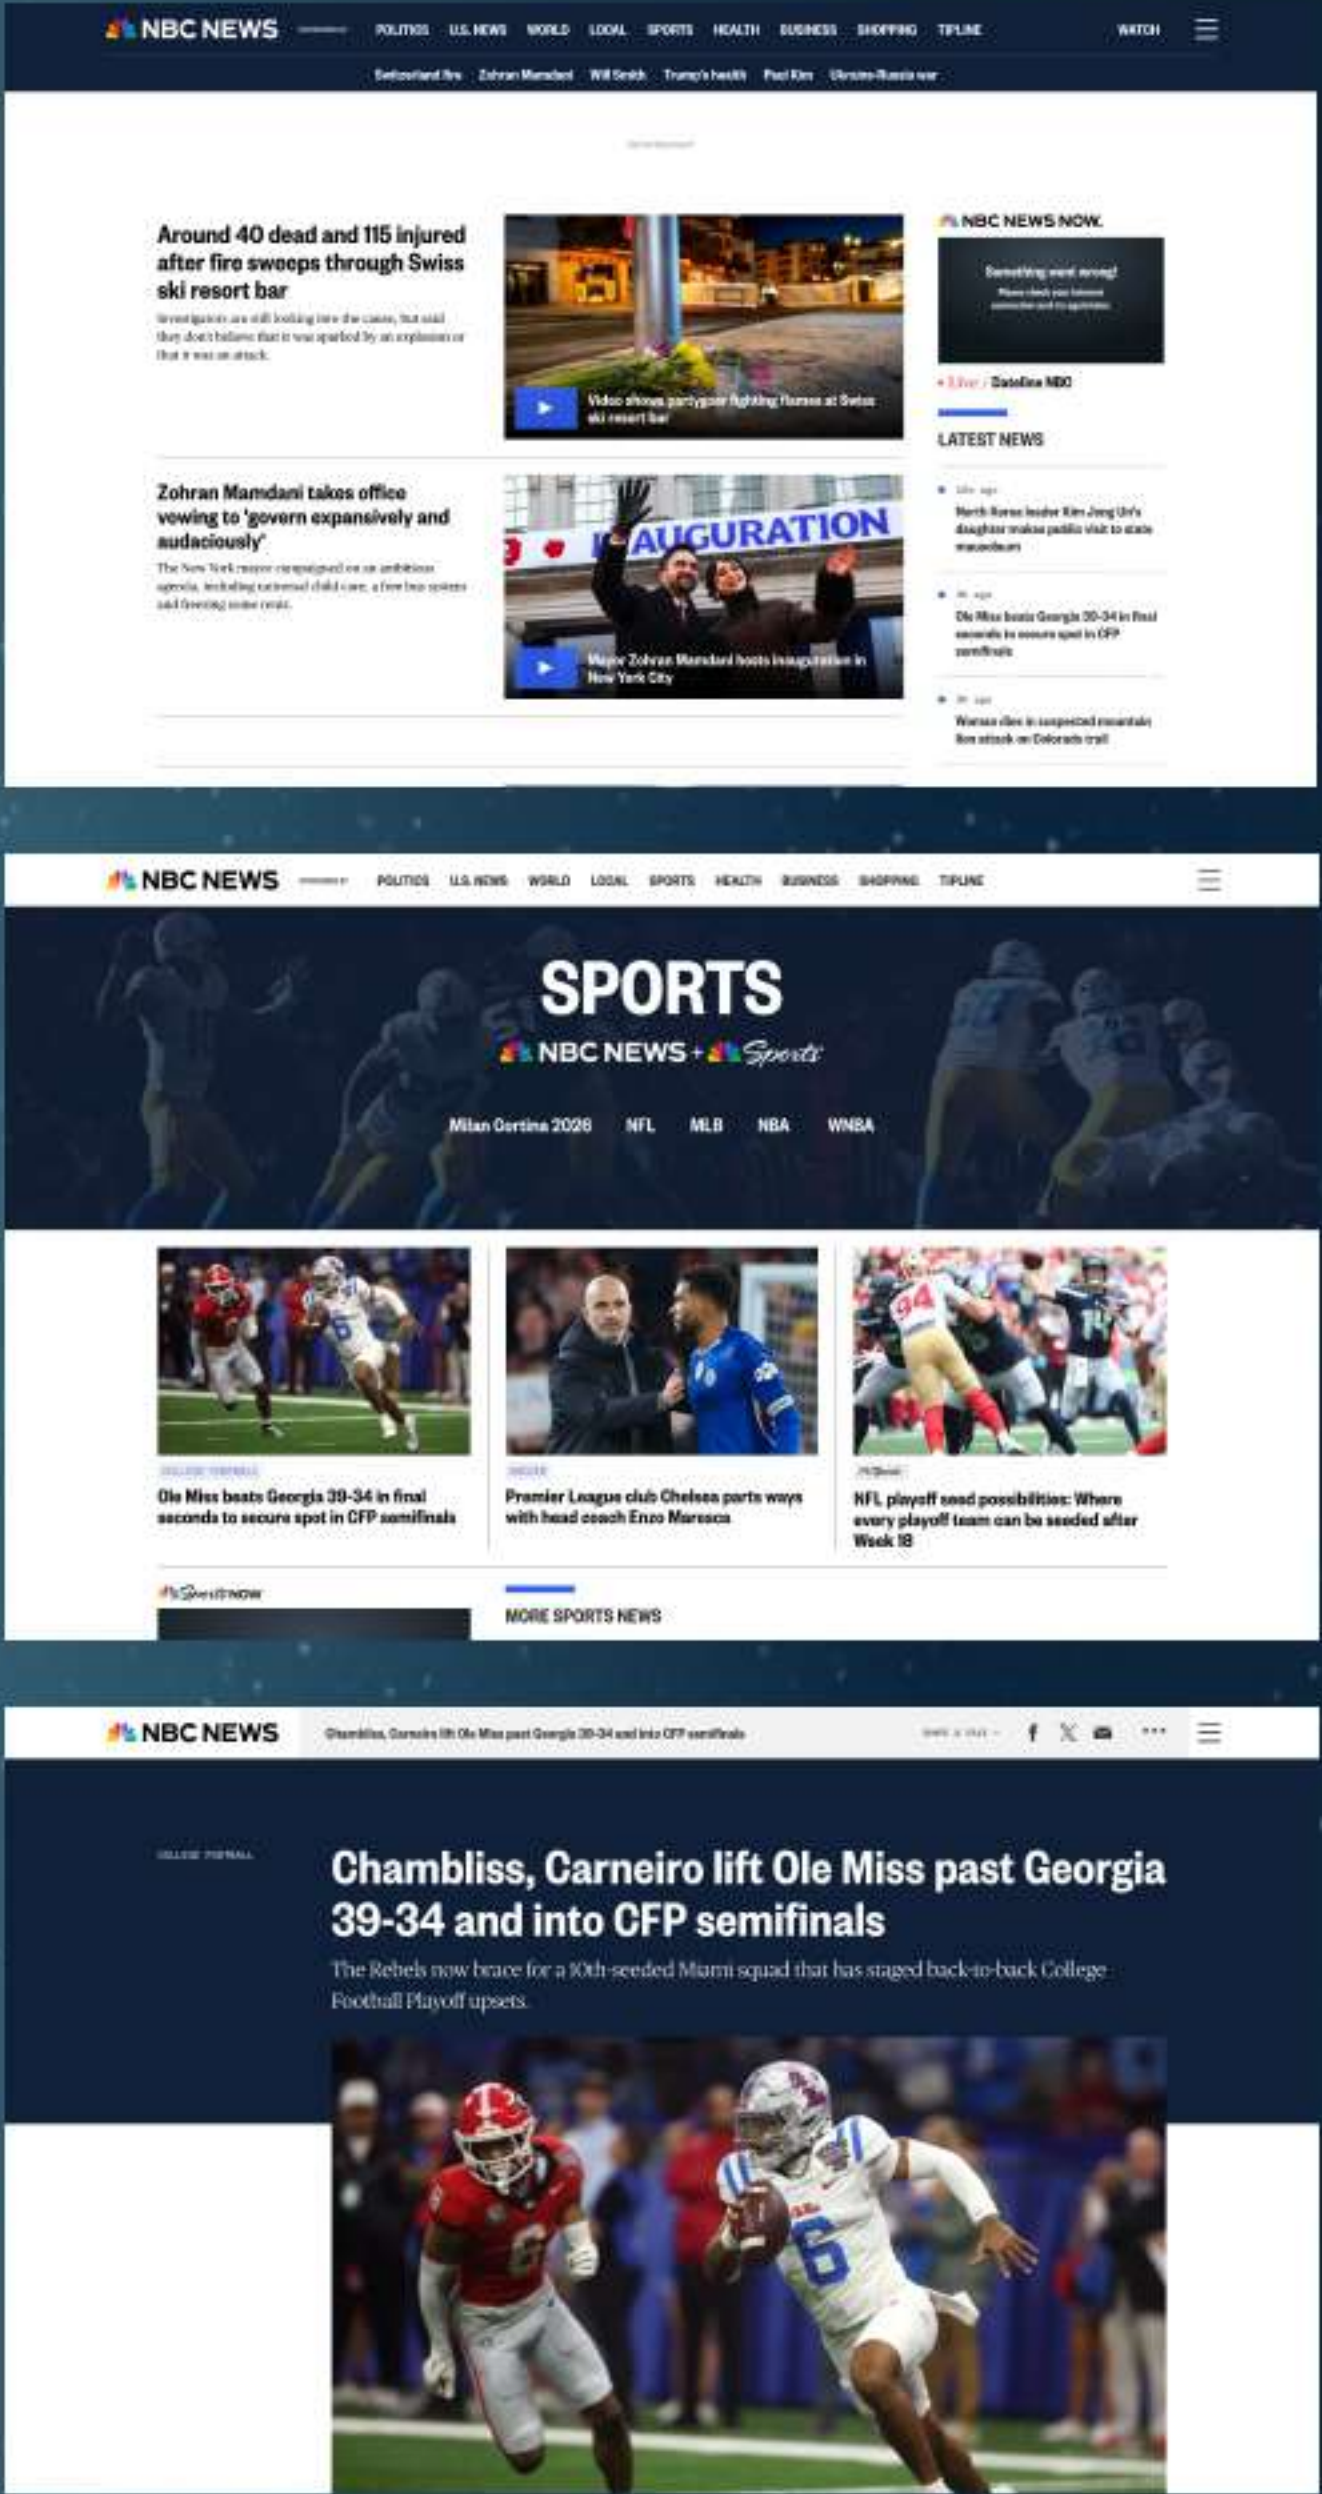

Tomorrow Times is a speculative design project that explores a future-oriented news website set in the year 2100. The project blends plausible scientific predictions with inspirations from science fiction films and novels, while referencing the structure and interaction patterns of today's leading global news platforms.

The goal is to imagine what kind of news will people on Earth be reading in the future, and to design an innovative media platform capable of presenting future news topics that could attract and engage audiences.

Group Coursework 2025.12

LOW-FIDELITY PROTOTYPES

Home Page

Sports Page

Article Page

WORKFLOW

1. AI Content Generation
Generated futuristic news
imagery and narratives

2. UI Design & Prototyping
Designed the user interface
and created interactive
navigation flows in Figma

3. Code Export
Utilized Figma plugins to export
foundational HTML and CSS
framework

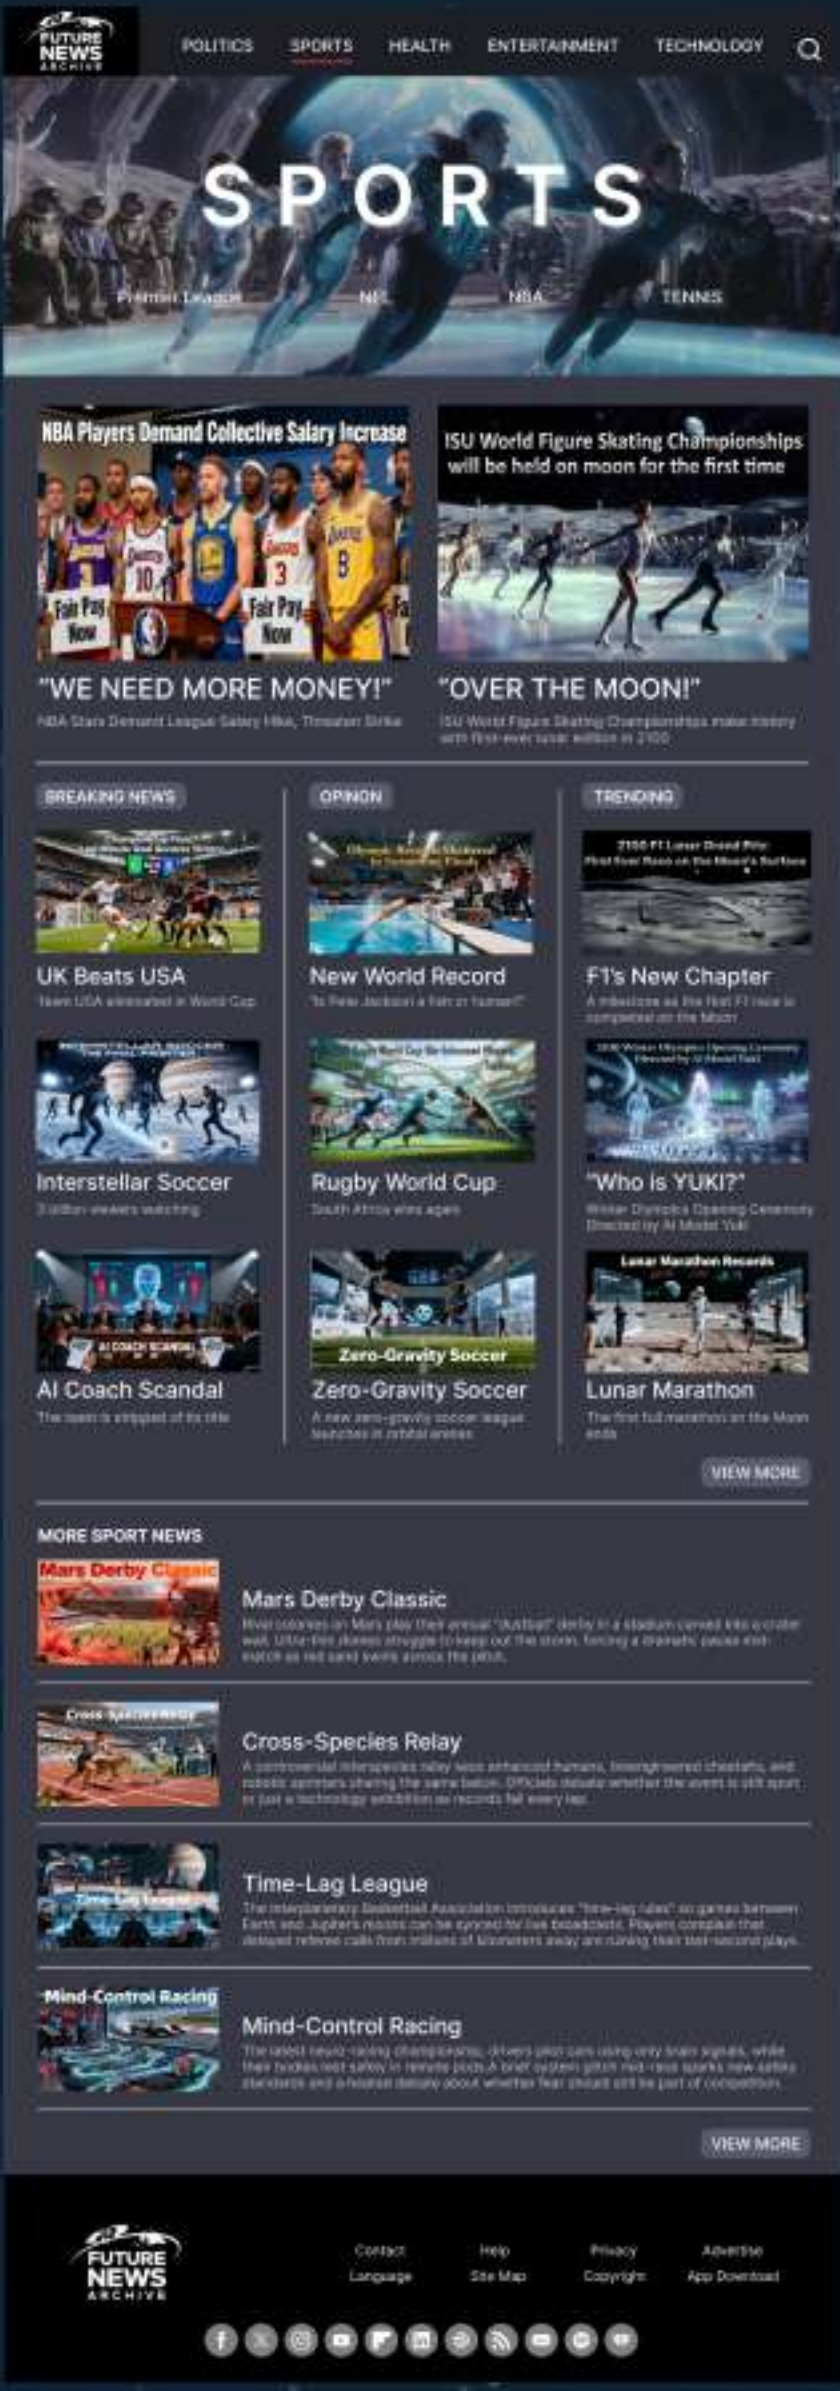

4. Code Optimization
Refined codebase (HTML, CSS,
JavaScript), integrating dynamic
and interactive features

FINAL DISPLAY
